Senior Mechanical Engineer

FULL-TIME ROLE

POSITION OVERVIEW

Caztek Engineering is an innovative Engineering and Product Development company. We develop products for a wide variety of industries including medical, aerospace, industrial, and consumer markets. We have a dynamic, creative, project-based environment, working on many cutting-edge and new product designs. As a Senior Mechanical Engineer, you will work alongside our experienced team of Industrial Designers, Engineers, Machinists and Product Fabricators to deliver exceptional designs, prototypes and products to our customers.

PRINCIPAL DUTIES & RESPONSIBILITIES

- Meet with clients, manage projects, and generate proposals
- Design mechanical assemblies, parts, and systems for customer projects
- Evaluate designs using simulation software such as FEA and CFD
- Create parts and assemblies using 3D CAD software (SolidWorks)
- Create mechanical drawings, Bill of Materials information, and other documentation needed for project completion
- Evaluate prototypes and designs for possible refinement through assembly and testing
- Facilitate customer project reviews
- Directly contribute to the solutions provided to customers including ideation, design, and specifications
- Sourcing components and engineering research
- Mentor staff engineers
